

Neschen Grip Guarantee

Neschen SolvoPrint Adhesive Vinyls and
Neschen Overlaminates

Neschen brand is now offering a Grip Guarantee for its new family of SolvoPrint adhesive vinyl products-ProGrip, SuperGrip, MightyGrip-when used with Neschen brand overlaminates. Our products are guaranteed to **grip** to each other and to your substrate for up to 10 years (durability varies based on below chart). As part of the Neschen Americas 100% Customer Satisfaction Guarantee, Neschen adhesive vinyl products combined with Neschen overlaminates provide excellent performance and are guaranteed to GRIP!

Print Media	Overlaminates	Indoor Durability	Outdoor Durability	Vinyl Grade

Coverage

The above products are warranted to be free of defects including:

- Visual and aesthetic defects in film, adhesive, or coating.
- Mechanical defects affecting usability in application.
- Variations in color or texture.

Application Guarantee Conditions

Neschen warrants the use and application of its products to perform to written characteristics as outlined in the matrix above. Please refer to the Neschen Product Tech Data Sheet or the Neschen Technical Service department for appropriate process conditions for use and construction of your application. When properly applied and installed the following products finished graphics are warranted to:

- Remain free of aesthetic and appearance defects including cracking, discoloration of face films, peeling, changes in gloss or texture, blistering, de-lamination or other degradation related to product performance that would make the application unsuitable for its intended purpose.

*For details on the guarantee limitations and warranty claims, please visit www.neschenbrands.com.

*Neschen is not liable for costs associated with printing, inks, substrates, converting, or any other cost, loss, or liability in any way related to the performance, use, or inability to use the product. This warranty remedy is limited to the distributor for products and/or the end user or fabricator for applications.

*In high UV index regions, such as, but not limited to, South Florida, Arizona and Colorado, outdoor durabilities are 50% of stated above.
