Neschen® Introduces New AccuCure™ UV Liquid Coaters

Elkridge, MD and ISA Expo, Las Vegas, NV, April 12, 2007: Neschen Americas will introduce two new Neschen® brand liquid coating systems at the ISA Expo 2007. The new **AccuCure™ 60 UV** and **AccuCure™ 80 UV** offer fully automated liquid coating and instant curing for digital prints up to 60 and 80 inches wide (152 cm and 203 cm). Designed for high-volume production, the new UV coaters can run at speeds up to 110 feet per minute (33.5 mpm) and can handle flexible and rigid substrates up to 3 inches thick (7.6 cm). Coating thickness is variable from 0.3 to 0.8 mils (7.62 to 20.32 microns) and independent roller controls allow adjustment of the coating texture.

Other key features of the new AccuCure coaters include three supply tanks, a unique “air knife” pneumatic separator system, and a fast, compact UV dryer. The multiple supply tanks allow operators to store two coatings and one cleaning solution on-board. Combined with the coaters’ automated cleaning cycle, this feature makes for fast coating changeover and easy routine maintenance. The air knife system allows lightweight materials to be coated without sticking to the rollers for smooth, jam-free production. Finally, the machines’ compact UV drying system offers fast, even curing of all coated materials, including large prints, yet it employs a space saving design.

The new Neschen AccuCure 60 UV and 80 UV coaters can be used to finish all types of digital prints, both electrostatic and inkjet, including solvent, eco-solvent, UV and dye sublimation inks. According to Neschen Americas Product Manager, Dave Conrad, “The

new AccuCure 60 and 80-inch UV coaters are an excellent compliment to today's flatbed printing systems, and offer shops fast, durable image finishing for production environments.”

Neschen offers a wide range of compatible liquid coatings for the new AccuCure UV coaters making them versatile, high-volume finishing systems. MSRP for the new AccuCure 60 UV is \$69,995 (USD). MSRP for the AccuCure 80 UV is \$89,995 (USD). For more information on Neschen liquid laminators and coatings, visit www.neschenamericas.com, or call 800-257-7325, ext. 2 (In Canada: 866-212-7325).

Neschen Americas manufactures and markets SEAL[®] and Neschen[®] brand products including film and liquid laminating equipment and materials, wide and grand-format printing media, substrate cutters, foam boards, mounting adhesives and tapes, display systems, and archiving supplies. The company serves the needs of the sign and display, digital printing, photographic, picture framing and library/archive markets throughout North and South America.
