

Liquid Coating System

Giclee Sign Coater

Finally a safe, yet effective, water based coating system for your fragile fine art pigment and non pigmented, dye-based ink jet prints that will keep them protected and looking beautiful for decades. No need to mop or spray to protect and enhance your valuable prints - use this low-cost, quick and easy system for professional results, every time!

The System

The Giclee Sign Coater uses a three step approach to protecting your fine art images... 1) Seal 2) Clear Coat 3) Dry. Depending on your type of inkjet receptive layer, you may need to Seal your *fragile prints to "set" the inks and prevent them from moving during the coating process. The second step is to coat the print with your choice of Giclee Clear, Gloss or Satin then third, let the prints air dry or cure.

The Giclee Sign Coater is used to apply both the UltraCoat™ Giclee Sealer and Clear Coat on prints up to 52" wide by any manageable length. Drying racks are used to store your prints during the drying/curing process.

Less is More

Less mess & odor - this environmentally safe system is easy to clean after use and requires no special ventilation, making it totally safe in any working environment and much more pleasant than traditional solvent based systems.

Compatibility

Printers

- Colorspan
- Encad
- Epson
- HP DesignJet
- Mutoh
- Roland Soljet
- Seiko Color Painters

Inks

- Colorspan Pigment
- Encad
- Epson UltraChrome
- HP UV
- Mutoh Eco Sol Plus
- Roland Eco Sol & HiFi
- Seiko OEM

Fine Art Media

- Intelliccoat
- Epson
- Fredrix
- Hahnemuhle
- HP
- IJ Technologies
- Mohab

Features

- Capable of coating individual sheets up to 52" wide
- Adjustable nip setting to accommodate a variety of substrates
- Ideal for short to medium runs
- Comes complete with stand
- Quick to install
- Easy to operate and no special training required
- Simple to clean - no scrubbing, no parts to remove

Liquid Coating System
