Laminates

filmolux®

www.neschenbrands.com

Neschen offers a full range of filmolux laminates for finishing and protecting digital prints. Our specialty is pressure-sensitive materials and our reputation for excellence, dating back decades, has expanded and evolved to meet the ever changing needs of the digital print market.

Choose from our wide variety of cold-laminating films to best fit the requirements of your project. Whether you are looking for a textured laminate to protect your image from heavy wear and tear or a glossy film to enhance the colors of your print, the Neschen filmolux line has the right product for the job.

filmolux® photo

filmolux photo is a premium grade, pressure-sensitive vinyl over-laminate with a glossy finish. It features UV absorbers that extend the life of your print, and a strong water-based acrylic adhesive that is ideal for short-term outdoor applications. Add color pop and a glossy sheen to any print with filmolux photo. Perfect for photographs and digital graphics displayed in indirect lighting.

filmolux® lustre

filmolux lustre is a premium grade, pressure-sensitive vinyl over-laminate with a luster finish. It features UV absorbers to extend the life of your print and a strong water-based acrylic adhesive that are ideal for short-term outdoor applications. Use filmolux lustre to maintain color vibrancy without the reflections of a gloss finish. Perfect for photographs and digital graphics displayed in indirect to moderate lighting.

filmolux® satin

filmolux satin is a premium grade, pressure-sensitive vinyl over-laminate with a satin matte finish. It features UV absorbers to extend the life of your print as well as a strong water-based acrylic adhesive that is perfect for short-term outdoor applications. Choose filmolux satin to minimize specular highlights and glare. Perfect for photographs and digital graphics displayed in moderate direct light.

filmomatt®

filmomatt is a premium grade, pressure-sensitive vinyl over-laminate with a matte finish. It features UV absorbers that extend the life of your print, and a strong water-based acrylic adhesive that makes it ideal for short-term outdoor applications. Choose filmomatt when it is essential to eliminate glare and reflection. Ideal for photographs and digital graphics displayed in direct light.

filmolux® UV-E

This high-grade, semi-gloss, Tedlar® PVF film provides the highest UV protection available - blocking over 87% of UV-A rays - which can nearly triple the life of the print. Its unique surface is graffiti-resistant and impervious to harsh chemicals and cleaning agents. Great for strip-mall pylon signage and other long-term outdoor applications.

filmolux® Cast Ultra

filmolux Cast Ultra is a glossy, cast vinyl over-laminate designed for the protection of a wide variety of fleet graphics. This film is highly flexible for use with the most complex curved and intricate surfaces. Pair filmolux Cast Ultra with Printlux® FS Cast Ultra 3400, a premium white self-adhesive vinyl, for a complete vehicle graphic solution.

filmolux® 2004

filmolux 2004 is a polypropylene over-laminate with a smooth, glossy finish that is well suited for creating write-on/wipe-off applications. Protect maps, calendars, court room displays, charts, menu boards, scoreboards and more with filmolux 2004. It is also an economic protective film for indoor photographs and other applications requiring a glossy finish.

filmotack® nippon

This 6 mil, vinyl over-laminate has a fine sand structure and a matte finish—making it scratch and slip resistant. It is best suited for indoor applications, such as pop-up trade show graphics, point-of-purchase displays, floor graphics and for protecting universal applications from heavy wear and fingerprints. It offers UV protection and features an ultra aggressive adhesive that is ideal for tough-to-stick-to media, such as white film.

filmolux® PC

This polycarbonate laminating film is one of our most durable. filmolux PC offers protection from UV rays, abrasion, moisture and exposure to other environmental factors. Its velvet-gloss, non-glare texture makes it a perfect choice for trade show graphics, as well as for applications requiring added rigidity. Available in 5 mil, 10 mil and 15 mil thickness.

NEW

filmolux® PP gloss

filmolux PP gloss is an economical 3 mil cast polypropylene laminating film featuring a permanent, water-based acrylic adhesive. filmolux PP gloss is constructed with a cast film making it perfect for over-laminating self-adhesive vinyl as well as a wide variety of indoor applications exposed to indirect light.

NEW

filmolux® PP satin matte

filmolux PP satin matte is an economical 3 mil cast polypropylene laminating film featuring a permanent, water-based acrylic adhesive. Its satin matte finish makes it perfect for indoor applications that are exposed to direct lighting.

NEW

filmolux® scratch

This premium 6 mil, polyester laminating film is designed for indoor display applications, and features a permanent, water-based, acrylic adhesive. This durable film's crystal-like texture protects display graphics from heavy wear and tear – making it an ideal choice for finishing flexible exhibit panels and point-of-sale displays. The satin finish also enhances color while reducing glare. Use filmolux scratch in combination with SolvoPrint™ or PrintLux™ media and an Expolinc® Pop Up Magnetic for a premium display system solution.

Product Technical Specifications

	Film Type	Adhesive Type	Thickness	Release Liner	UV Protection	Roll Wound
filmolux photo	Vinyl	Water-based Acrylic	3.2 mil	Siliconized Kraft Paper	Yes	Face Film Out
